Reviewer Recommendation: Revision Required Overview: For the convenience, I made some linguistic changes in the manuscript for the author's attention. I would prefer the acceptance of the changes by the authors for a better understanding of the readers of this journal.	I have accepted the changes in the revised manuscript version.
Red is my correction. Please check grammar and language, especially from the method section to the conclusion	I have accepted the red corrections. I also did grammatical and language corrections from introduction to conclusion.
Please number the figure and cite them in the manuscript, such as there is no of the first figure. And make a combined figure, which means it should be drawn in a single file (jpg, tiff).	I numbered the figure 1 and cited it in the 2.2.1 section. I also made a combined figure in a single jpg file.
Please provide a comprehensive title for all the Tables. Title/legend should represent the findings and data of the tables (which data is incorporated/name of the data/types, etc)	I provided comprehensive titles for all the tables.
Provide the footnote below each table for the symbol or short form	I provided comprehensive footnote below of each table.
Check the space problem, punctuation throughout the manuscript	I corrected the space and punctuation throughout the manuscript. I tried to maintain 1.5 line spacing.
Apply the proper utilization of the units of each finding or value.	I kept all units of each finding or value in centimetre-gram-second unit system.
Use the minus sign, not the hyphen.	I corrected the minus sign instead of hyphen.
